Detailed Action

Response to Amendment

1. The Examiner acknowledges the cancellation of claims 29-37 and 53-59 and accepts the amendment to the objection of claims 38 and 39. Therefore, the objection to claims 38, 29 and the dependent claims 40-48 and 61 is withdrawn.

Allowance

2. Claims 1-28, 38-52, 60 and 61 are allowed. The following is an examiner's statement of reasons for allowance:

In reference to claims 1, 24, 38, 49 and 60: Quist et al. (U.S. Patent 6,199,018, hereon Quist) teaches a distributed diagnostic system in which the plurality of local monitoring devices collect local information concerning various machines and process that information (see Quist, column 2, lines 10-35) and Takizawa et al. (U.S. PAP 2005/0259903, hereon Takizawa) teaches a bearing device and ring with sensor for the bearing device with a diagnostic where a detecting sensor circuit is attached to the inner race of the bearing (see Takizawa, Fig. 6B). However, none of these references teach a controlling processing portion for feeding back a control signal to a control system of the railway vehicle based on the decision result or a filtering processing portion for removing an unnecessary frequency band from a vibration waveform from the vibration sensor, an envelope processing portion, frequency analyzing portion for analyzing a frequency of a waveform transferred from the envelope processing portion, a comparing/collating portion for

comparing a frequency generated due to damage calculated based on a rotation speed with a frequency derived based on actually measured data, and result outputting portion for identifying a presence or absence of the abnormality and an abnormal location based on a compared result in comparing/collating portion of the unit.

The remaining claims 2-23, 25-28, 39-48, 50-52 and 61 are dependent upon claims 1, 24, 38, 49 and 60 and contain further limitations.

Citation of pertinent prior art

- Post (U.S. Patent 5,356,098) teaches communication system for transmitting RF signals representative of defects or hazards in Railway system having frangible glass activation.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
